## BIO-SOIL Sachets

ECO-FRIENDLY CONTAMINATED SOIL DIGESTER

### Product specifications sheet

#### Description

Biological active, enzyme producing, aerobic, facultative and anaerobic combination of micro-organisms and fungi for the breakdown of sewage, lipids and hydrocarbons. Containing fermentation enhancers and active enzymes. Bio Soil is a natural biological high potency soil treatment additive. Bio Soil contains no pathogens or harmful toxins and chemicals. Bio Soil is effective in both oxygen rich environments as well as oxygen deprived environments

#### Dosing guideline

Use contents of 1 drum (i.e. 40 x sachets) per 10 m<sup>3</sup> of sewage or hydrocarbon-contaminated soil. Tilling, watering and additional nutrient also required as calculated for each specific terrain conditions – to be liaised with DEKKER BIOTECH.

#### Guaranteed analysis

12 Billion cfu/gram of a multi-strain microbial species and white-rot-fungi  
Lipase 1,800 FIP/gram

#### Physical Properties

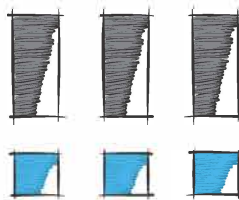

Physical state:	Water-soluble-sachets filled with powder
Colour:	Tan
Odour:	Mild yeast-like fragrance
Solubility in water:	Dispersible in water

#### Storage conditions

For optimal results store in cool dry place under 30 °C out of sunlight

#### Package sizes

Available in 60-gram water-soluble-sachets, sealed in plastic drums containing 20 x sachets per drum
