

eco-active POWDi GEST

POWDER-DIGEST sachets

Product specifications sheet

Description

High concentration microbial wastewater treatment additive.

Powder Digest is a natural biological high potency waste water treatment additive.

Powder Digest contains no pathogens or harmful toxins and chemicals.

Powder Digest is effective in both oxygen rich environments as well as oxygen deprived environments.

Ingredients

Biological active, enzyme producing, aerobic, facultative and anaerobic combination of micro-organisms for the breaking down of Complex Organics, Fat Solids, Protein and Wastewater Sludge, containing active organic acids and other substances as stimulants and nutrients for microbes.

Guaranteed analysis

12 Billion cfu/gram of a multi-strain microbial species

Lipase 1,800 FIP/gram

Physical Properties

Physical state: Water-soluble-sachets filled with powder

Colour: Tan

Odour: Mild yeast-like fragrance

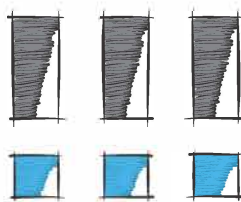

Solubility in water: Mostly soluble in water

Storage conditions

For optimal results store in a cool dry place under 30 °C out of sunlight.

Package sizes

Available in 60-gram water-soluble-sachets, sealed in plastic drums containing 20 x sachets per drum
